DETAILED ACTION

The preliminary amendment filed on 8/11/2006 has been entered. Claims 1-10 are presented for examination. The priority document filed on 8/11/2006 has been entered.

Specification

The abstract of the disclosure is objected to because it needs to be provided on a separate page. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-4, 9 are rejected. Specifically, claim 1 recites the limitation "a time data" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Similarly,

Claim 1, line 8, the limitation "a point of time" lacks a proper antecedent basis.

Claim 4, line 5, the limitation "said non-cast fishing gear" lacks a proper antecedent basis from claim 2. The proper support for the limitation is found in claim 3.

Allowable Subject Matter

Claims 5-8, 10 are allowed.

Claims 1-4, 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose a method for surveying fisher resources comprising the steps of: (i) obtaining operating position data, time data by means of GPS; (ii) obtaining identification data giving in an identification means; (iii) executing, processing for the position data, time data, and identification data; (iv) counting the number of fishes and marine lives caught, associating the fish catch number with a plurality of fishing gears for a particular operating position and a particular operating time; (v) executing processing based on the particular fish catch number data, identification data, finding a match between the particular identification data and the identification data, and determining a definite operating position data and a definite fish catch number data; and having the functions and characteristics in the manners as recited in claim 1.

The prior art also fails to disclose the limitations of claim 5.
